EDUCATION

University of Cincinnati, Cincinnati, Ohio **Graduating: May 2028**
Bachelor of Engineering and Applied Science, Computer Science
GPA: 3.61
Primary Coursework: Data Structures, Python Programming, Computer Systems

University of Cincinnati, Cincinnati, Ohio **Graduating: May 2028**
Master of Engineering and Applied Science, Artificial Intelligence

SKILLS

Programming: C++, C#, XML SQL and Python
Frameworks: Matplotlib, NumPy, scikit-learn, Pandas, LINQ, Window Forms
Software: Git, PowerShell, Command Prompt, Active Directory, Remote Desktop Protocol, Jama

EXPERIENCE

MPG – Pole/Zero | Cincinnati, Ohio **Jan 2026 – Apr 2026**
Software Engineering Intern

- Assisted in the development of a new application that aimed to help debug test equipment and run methods via reflection
- Debugged and contributed to a shared codebase to update outdated logos and got rid of unsupported equipment classes
- Supported continuous development by enhancing an equipment calibration application by creating a UI that displayed equipment diagrams during calibration.

Thermo Fisher Scientific | Cincinnati, Ohio **Aug 2024 – Aug 2025**
IT Intern

- Lead and organized IT technical review board meetings across the pharmaceutical business group
- Wrote automatic email PowerShell scripts to send company group information categories to managers
- Assisted in the network configuration and support of computers that handle sensitive pharmaceutical data
- Collaborated with the rest of the IT team to help update about 500 devices from Windows 10 to Windows 11

Central Catholic High School | Canton, Ohio **Aug 2021 – May 2023**
IT Student (Volunteer)

- Diagnosed dozens of possible problems and disassembled 30+ school laptops
- Replaced dozens of broken screens, keyboards, and touchpads
- Trained 3+ others how to fix laptops so more laptops could be given back to students

PROJECTS

Test Equipment Analyzer | MPG – Pole/Zero **Jan 2025 – Apr 2026**

- Revamped the user interface using Microsoft Windows Forms to make the software easier to follow and understand
- Added functionality such as method calling via reflection, equipment detection modes and editable filters
- Created config files to cache previously used equipment filters that are used to assist in equipment detection
- Wrote software requirements and verifications to give clear and documented necessities that are required by the software

Enhanced Repository Analyzer | MakeUC Hackathon **Nov 2025**

- Created a GitHub repository AI summarizer in python that gave information such as the number of commits, code summaries, and repository creation dates.
- Developed an API that gathers a repository URL that is then sent to the Gemini AI Agent to review and give summaries on the repository
- Collaborated with 3 team members to ship the project out in 24 hours and present it

Wi-Fi Improvement Project | Thermo Fisher Scientific **Jan 2024 – Aug 2025**

- Developed a site wide survey to analyze about 20 areas for Wi-Fi improvement
- Directed a Wi-Fi surveyor to over 250,000 sq ft around the site
- Collaborated with cabling and network team to help install and configure 61 new access points

Disaster Recovery | Thermo Fisher Scientific **Aug 2024 – Dec 2024**

- Cooperated with the Engineering department to get an updated floor diagram of the data center
- Recorded all 21 IDF and Data Center rack diagrams of network and server infrastructure into an excel file

AVAILABLE FOR CO-OP: Fall 2026
